SERVICE BULLETIN

AIRCRAFT EFFECTED: All models PRIOR TO 2013
BULLETIN NUMBER: SB020
ORIGINAL ISSUE DATE: 23-12-06
REVISION DATE: 01-11-2026
SUBJECT: Fiberglas seat support
APPLICABILITY: All KFA airframes PRIOR TO 2013
COMPLIANCE: Mandatory

Problem: The potential exists for the seat to collapse during a high "G" situation.

This could bring the seat bottom to bear on the elevator and flap control rods, possibly affecting controllability.

Solution: Fabricate and install seat support straps.

Use seatbelt webbing to make 4 support straps, 2 for each side to support the seat.

Run each strap over and round the front and rear bungee truss, adjust the length to just support the bottom of the seat each side of the moulded hat brace on the seat.

Clamp and rivet in position with aluminium flat bar.
